If the vaccine stock is unavailable onboard, they are still permitted to embark and work, but should receive the vaccination as soon as it becomes available. Crew with regular Hep A vaccines: Authorization to work is granted with one dose for up to 12 months after the initial dose. After 12 months, a second dose is required to maintain authorization to work. <i>After 10 years: Proof of immune response required after 10 years since last dose (antibody check valid for 10 years). If immunity not confirmed, booster dose required</i> <i>Where no proof of vaccination can be provided, IgG blood test confirming immunity must be completed (antibody check valid for 10 years)</i> Ethiopian Crew: Due to no availability of vaccination in Ethiopia, authorised to receive required doses onboard Positions Requiring Hepatitis A Vaccine - New position highlighted blue, implementation by 1st July 2026 Costa Vessels: • Staff Captain • Chief Engineer • Staff Chief Engineer • 1st Engineer/ 2nd Engineer/ Engine Cadet • 1st Engineer Maintenance • 1st Bosun • 2nd Bosun • Able Seafarer • Ordinary Sailor • Deck Utility • Foreman • Plumber / Assistant Plumber • Motorman (daily) • Motorman (watch)/ Oiler • Engine Utility • Chief Doctor & Doctor • Chief Nuse & Nurse • Recycling Operator / Garbage Handler • Process Technician / Process Engineer • Engine Officer (3rd Engineer) • Waste Water Plant Assistant • Facility Manager • Fitter / Assistant Fitter • Service Engineer Riding Team • First Service Technician Riding Team/ Service Technician Riding Team • Service Utility Riding Team			X	
Hepatitis B	1 st	After 1 month	After 6 months	10 years	Proof of Vaccination required * After 10 years: Proof of immune response required after 10 years since last dose (antibody check valid for life). If immunity not confirmed, booster dose required <i>Where no proof of vaccination can be provided, IgG blood test confirming immunity must be provided (antibody check valid for life)</i>				X
Pertussis	1 st	N/A	N/A	10 years	Proof of Vaccination required* Combined Pertussis / Tetanus Vaccines is accepted <i>Where no proof of vaccination can be provided, IgG blood test confirming immunity must be completed every 10 years</i>				X

VACCINATION	Date of 1 st dose	Date of 2 nd dose	Date of 3 rd dose	Validity:	Notes	All Crew members	Food Handler	Other Positions (see notes)	Medical Staff
Tetanus	1 st	N/A	N/A	10 years	Proof of Vaccination required* (Controlled by Medico Competente) All Italian Seafarers (mandatory for seamansbook according to “Seafarers and port operators”/ law integration of 16 September 1975. 22 October 1975, n.280 Combined Pertussis/ Tetanus Vaccine accepted	Required for all Italian Seaman Books			
Varicella	1 st	After 1 month	N/A	life	Proof of Vaccination <u>OR</u> laboratory confirmation of previous disease (IgG) required* If one documented dose of varicella vaccine was received in the past, the second dose may be given at any time, with at least 1 month between doses. If there is no documentation of prior vaccination or immunity not confirmed, a full two-doses is to be given	X			
					Ethiopian Crew: Due to no availability of vaccination in Ethiopia, authorised to receive required doses onboard				
Yellow Fever	1 st	N/A	N/A	life	Proof of Vaccination required *(when vaccination is required for specific Itinerary / destination requirements) Original Documentation ONLY , no copies will be accepted In case vaccination must be administered when crew member is already embarked, onboard medical team will arrange administration via an external provider authorised to administer and therefore vessels scheduled to travel to countries where Yellow Fever vaccination is necessary must carry onboard an adequate amount of vaccines	X (where required by Itinerary) Mandatory for Itineraries 2026/2027 World Cruise, Asia, South America, South Africa, Panama and Colombia			

REMARKS

*

Proof of Vaccination can include original documentation, copies of documentation, digital certificates . No proof of vaccination document (original or copy) is valid without stamp and signature or digital validated signature.
The stamp / signature / digital validated signature, where present on original, is not needed on the copy

Costa Only: Crew Members are required to self pay for embarkation vaccinations completed onboard. Payment will be later reimbursed if vaccination is required by Corporate Standards (as specified in procedure P 5.5.04 IO 03)

Unofficial Vaccination Record / Positive Immune Lab Result documented in past medical records: On practice letterhead, Dr signature, stamp and attestation required confirming that an individual received the vaccine on a specific date or has a positive immune lab result documented in their past medical records

Official report from a laboratory: The information must be presented in an official laboratory report format and should clearly reflect standard laboratory documentation practices. Preferably the report contains a signature and stamp from a Doctor.

Tuberculosis Screening
<i>is mandatory every two years for crew residing in one of the below countries and Medical Staff</i> Mantoux test (also known as Tuberculin)/PPD test, (Not Accepted: TINE Test) <u>OR</u> , QuantiFERON test <u>OR</u> Pulmonary x-Ray with Medical Certificate from Pulmonologist Doctor or Infectious Disease Specialist **Where crew present to embarkation without Pneumologist report, X-Ray (where no X-ray, can be completed onboard) to be reviewed via a Telemedicine consultation with a Pneumologist or Infectious Disease specialist. Crew Member must remain off duty until report is available. **
Tuberculin intradermal reaction (Mantoux test/PPD test) should be considered positive in subjects with a negative history of TB if the diameter of the skin infiltrate is equal to or greater than:-5 mm in HIV+ subjects, -10 mm in subjects from high endemic countries (see the below list), -15 mm in subjects without risk factor for tuberculosis disease In case of a positive Test, the C.M. can only embark if provided of a Medical Certificate issued by a Pulmonologist or by an Infectious Disease Specialist who declares that the seafarer doesn’t have an active TB disease. The crewmember which for any reason has an ongoing TB treatment, must denied to embark. The TB screening is mandatory every two years for crew residents in one of the below countries and Medical Staff A: Algeria, Angola, Afghanistan, Armenia, Azerbaijan B: Brazil, Belarus, Benin, Botswana, Burkina, Bangladesh, Burundi, Bolivia, Brunei, Bhutan C: China, Cameroon, Cambodia, Congo, Central African Republic, Capo Verde, Chad E: Ecuador, Ethiopia, Eritrea F: Fiji G: Gabon, Gambia, Ghana, Gibuti, Guinea, Georgia, Groenlandia, Guyana, Guam H: Honduras, Hong Kong Special Administrative Regions of the People's Republic of China, Haiti I: India, Indonesia, Islands Marianne, Islands Solomon, Ivory Coast K: South Korea, North Korea, Kenya, Kiribati, Kazakhstan, Kyrgyzstan L: Lithuania, Laos, Lesotho, Liberia M: Madagascar, Maldives, Mozambique, Myanmar, Malawi, Mali, Morocco, Mauritania, Macao Special Administrative Region of the People's Republic of China, Malesia, Mongolia, Marshall, Micronesia N: Namibia, Nicaragua, Nigeria, Nepal, Niger, Nauru P: Philippines, Peru, Pakistan, Papua New Guinea, Palau R: Romania, Rep. Moldova, Russian Federation, Rep. Dominican, Ruanda S: Sierra Leone, South Africa, Somalia, Senegal, Sudan, Swaziland, Sri Lanka T: Thailand, Tanzania, Tajikistan, Togo, Timor, Turkmenistan, Tuvalu V: Vietnam, Vanuatu Z: Zambia, Zimbabwe
Food Handler Laboratory Screening
<i>List of food handler positions are outlined in HR-6001 Annex 1</i>
Tests are valid for 12 months Follow brand specific PEME templates for exact timelines of validity Throat culture (to verify absence of Group A streptococcus, staphylococcus, candida albicans, neisseira meningitides, other bacteria or fungi) Stool culture (to verify absence of pathogenic bacteria). To be checked: salmonella, shigella, campylobacter, E-coli, clostridium) Ova and parasite test (can be taken from stool sample) (to verify absence of Giardia, Cryptosporidium, Entamoeba hystolitica)
